NATURE AND ENVIRONMENT SPECIALIST

2 years of experience, ISO 1400 Certified

BSC Environmental Sciences / Data Analytics Certification

Identifying and addressing emerging environmental challenges
Analytical mindset with a focus on sustainable solutions

CORE COMPETENCIES

- **Climate Action Strategy:** Contributed to the "Solutions" and "Metrics" teams to identify and address political and technical challenges related to reducing greenhouse gas emissions for two health sector clients.
- **Content Development:** Authored open-access articles published on the organization's website, focusing on sustainable solutions and metrics (2 articles published).
- **Environmental Project Management:** Led the development and launch of a platform for environmental initiatives addressing key sustainability challenges, integrating data-driven strategies to optimize project development.
- **Impact Assessment:** Conducted environmental impact evaluations.
- **Stakeholder Engagement:** Collaborated with diverse teams to streamline project workflows.
- **Technical Support:** Supported REDD+ projects to address environmental challenges, resulting in improved project timelines, including the translation of two strategic documents.
- **Communication Facilitation:** Enhanced the efficiency of two REDD+ programs by implementing a streamlined communication strategy, reducing information dissemination time and increasing stakeholder engagement.
- **Program Support:** Contributed to the successful implementation of environmental initiatives.
